### **ELECTION / RESTRICTION**

1. The applicant's Preliminary Amendment filed 02 FEB 05 has been entered. Following the entry of the Preliminary Amendment, **Claim(s) 1-10 and 12-20** is/are pending.

### **LACK OF UNITY**

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1. In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

**Group I, Claim(s) 1-4**, drawn to a method of detecting nucleic acids using DNA microarrays.

**Group II, Claim(s) 5-7**, drawn to a nucleic acid detection apparatus.

**Group III, Claim(s) 8-10 and 12-20**, drawn to a DNA microarray.

2. **Groups I and II** lack unity :

**Groups I and II**, as drawn, do not relate to a single general inventive concept because the claims are not linked by the same or corresponding special technical feature. Groups I -III, as drawn, are related to each other in that they comprise a DNA microarray comprising a plurality of nucleic acid probe parts having a nucleic acid sequence capable of hybridizing to a specific nucleic acid . However, as a DNA microarray as recited was known - see, at least, for example, Lockhart et al. [Nature Biotechnology 14 :1675-1680 (DEC 1996)] - the claims are no longer linked by the

Art Unit: 1634

same or corresponding special technical feature, because by definition, the special technical feature must distinguish over the prior art. Without the special technical feature the claims lack unity.

3. Because these inventions lack unity for the reasons given above, restriction for examination purposes as indicated is proper.
4. The examiner, on 28 JAN 07, attempted, but was unable to reach the applicant regarding an oral election to the above restriction requirement. The applicant is advised that the response to this requirement, to be complete, must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
